

Industrial HMI WebPanel

Rugged ARM-based Touch Panel PC

Seamless integration with Industry 4.0 applications
Works with all control units with integrated web server

**MADE IN
GERMANY**

German engineering from design, manufacturing to technical support

Rugged, full metal housing
Wide operating temperature range

GMK
electronic design gmbh

Display

- Multi Touch PCAP
- Chemically strengthened cover glass
- Brilliant display with high resolution and brightness

Housing

- High-quality aluminum housing in silver or black
- Robust, durable, and compact construction
- Front Side IP65
- Remarkable low depth
- Maintenance-free hardware
- Fanless design
- Easy to mount, VESA standard
- Mountable on swivel arm support systems for ergonomic workstations

Software

- Embedded Linux system
- In-field firmware updates
- Easy to connect to various control units

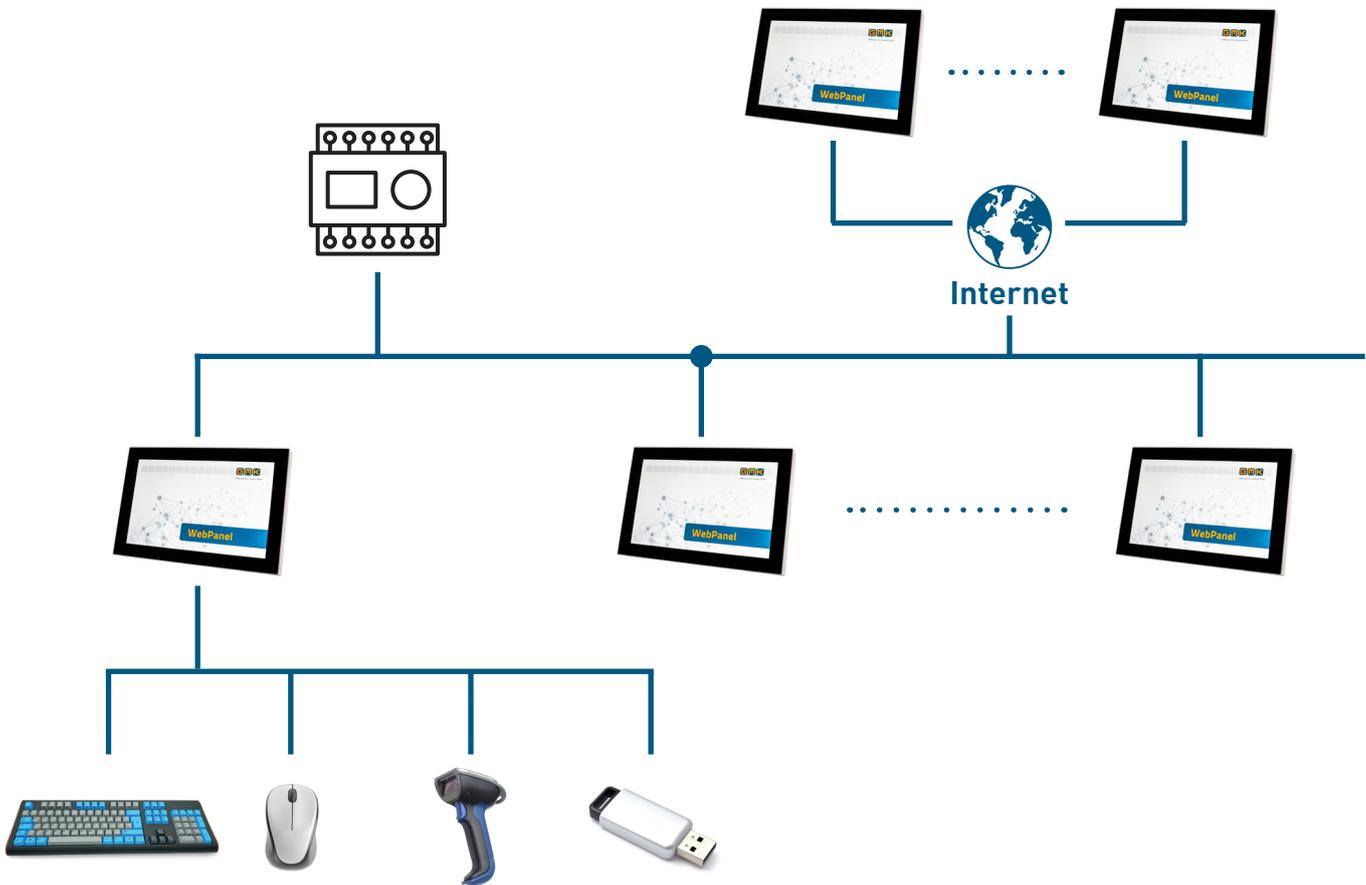

Further Benefits

- Long term availability and high service level from a German based company
- Fully functional broad support package (BSP)
- Wide operating temperature range
- Eye-catching design enhancing any machine or automation system
- High-performance with low power consumption

**Scalable solutions through individual customization
of hard- and software**

Industry 4.0 – easy to integrate

HMI WebPanel Series
